

Hermes López Alba

Senior Product Designer — B2B & B2C SaaS, Data-Driven UX, AI-Augmented Workflows

Bogotá, Colombia hermeslopezalba@gmail.com linkedin.com/in/hermeslopezalba hermeslopez.framer.website

Profile

I'm ~~passionate~~ obsessed with creating products that simplify complex tasks. I've been doing this for 6+ years end-to-end across B2B and B2C SaaS, from early-stage products built from scratch and launched to design systems used by 100 engineers. I run AI-augmented workflows not because it's trendy, It's because I can spend more time on the parts that still need a human, and occasionally write enough code to make a proof of concept without waiting on devs.

Experience

Nebutek | Senior Product Designer | Aug 2024 – Apr 2026 · Remote · Omaha, USA

- Led end-to-end design of [Fleet Defender](#), an AI-assisted fleet security platform supporting operations across 60,000+ trucks, served as strategic design partner for the product squad, aligning stakeholder business requirements with user needs.
- Created [Roadpact](#), an AI-assisted HR platform, transforming complex logistics data into operational dashboards for fleet managers and decision-makers; besides improving users data collection speed by ~40% without any loss of quality, measured by usability testing sessions.
- Translated API specs into developer-ready dashboards with structured data field documentation, reducing engineering handoff cycles by ~70%.
- Built a multi-brand design system using Figma Variable modes, and design tokens, fully synced with Tailwind CSS primitive classes and WCAG 2.2 AA color and contrast compliance for all UI components.
- Integrated AI tools into the daily design workflow: LLMs for analyzing user research data, Figma Make, Claude and Cursor for rapid prototyping of functional front-end UI component and layout exploration (REACT/HTML/CSS TAILWIND), cutting ideation-to-prototype and implementation time up to ~80% for some features.

Universidad Industrial de Santander | UX/UI Design Lead | Jun 2022 – Jan 2024 · Colombia

- Led UX design strategy and leadership for a B2B [ERP ecosystem](#) serving 2,000+ administrative users — managed cross-functional stakeholder communication across academic, administrative, and IT teams.
- Redesigned the B2C mobile app (50k+ users) applying systems thinking and service design principles; resulted in a [4.6 Play Store](#) rating and ~70% reduction in daily task completion time, validated through iterative usability testing and A/B experimentation.
- Created a design system from scratch — design tokens, components, and full design documentation — with WCAG 2.1 AA/AAA accessibility standards baked into color specs and component states, achieving ~30% team efficiency gain in design-to-development cycles.
- Mentored junior designers through structured critique sessions, design pairing, and the introduction of onboarding playbooks that standardized async collaboration and accelerated team ramp-up by ~50%.

IncubAPP Venture Capital | UX/UI Consultant | Jun 2022 – May 2024 · Colombia · Concurrent, Freelance

- Planned and developed MVPs across fintech, edtech, and B2B/B2C SaaS products (web & mobile) — led discovery, Jobs-to-be-Done (JTBD) mapping, and service design workshops from 0 to launch.

- Ran generative research, heuristic reviews, card sorting, and tree testing; synthesized insights that informed conversion optimization and feature prioritization, increasing by ~25% across two products.

IncubAPP Venture Capital | UX/UI Designer | Nov 2020 – Jun 2022 · Colombia

- Developed MVP web and mobile products for early-stage startups in B2C and B2B markets, covering full-cycle design from discovery to developer handoff.
- Collaborated closely with founders and engineers delivering rapid prototypes using Figma and Framer, iterating on design based on user feedback and product analytics.
- Supported stakeholder alignment through structured design presentations, written design documentation, and async video walkthroughs — establishing async-first communication practices early in my career.

Skills & Tools

Core craft: End-to-end product design, UX research, information architecture, interaction design, high-fidelity prototyping, design systems, design tokens, design ops, service design, systems thinking, A/B testing, conversion optimization, data-driven UX, Jobs-to-be-Done (JTBD).

Accessibility: WCAG 2.2 AA/AAA compliance, inclusive design, contrast audits, screen-reader-aware component specs.

AI tools: Claude (ai, cowork, code), ChatGPT, Gemini, NotebookLM, Figma Make, Notion, v0 (Vercel), Lovable, Cursor, — used daily for rapid prototyping, ideation, and research synthesis.

Design tools: Figma (Variables, Dev Mode, Auto Layout), FigJam, Miro, Framer, Wordpress, Storybook, Zeroheight.

Research & analytics: Usability testing, tree testing, card sorting, Dovetail, Posthog, Amplitude, Maze, UserTesting

Engineering collaboration: HTML/CSS, Tailwind CSS, React, Flutter, Angular, Kotlin, Swift, Git, Github, Supabase, Cursor, VS Code, Loom, Jira, Notion, Monday, Trello, Linear.

Education

B.Sc. Industrial Design — Universidad Industrial de Santander 2014 – 2022

Continuous Learning — Platzi · Product Design & UX/UI Courses 2020 – Present
